

FIT KIT™

Does Size Really Matter? When it comes to condoms, the answer is yes. Introducing They-Fit Condoms, featuring 55 different sizes to ensure maximum comfort and security. To find your ideal condom, follow the instructions below to measure your Johnson and identify your custom size.

INSTRUCTIONS:

1 Cut on dotted lines to remove and separate alphabetical length measurement from numeric width measurement.

2 Crease length measurement strip down center to create a V-like shape. Place erect penis down center only as far as condom would unroll to find your letter.

3 Next, wrap numeric fit strip around middle of erection to find your corresponding number.

WHAT TO DO NEXT:

Refer to the Fit Kit Chart below to find your individual condom size! Your custom fit is shown where your alphabetical length row meets your numeric width column. Please note: your "custom size" as determined by this Kit is a suggested size. You may want to choose a slightly different size based on your individual preference.
